KATIE MILLER WELLNESS COACH

COMPETITIVE WEBSITE ANALYSIS

Fitness · Women's Health · Peptides

"Know the best. Outperform the rest."

26	3	6
Websites Analyzed	Niches Covered	Scoring Dimensions

Prepared by Katie Miller Wellness Coach · May 2026
millerelitefitness@gmail.com

Section 1: Introduction & Purpose

This report analyzes 26 websites across three high-growth niches — Fitness, Women's Health, and Peptides — to identify what the most successful sites do and what the weakest sites lack. The findings provide a blueprint for building high-converting, trust-generating websites for clients in these spaces.

Scope	United States (with select international brands)
Research Method	Direct homepage analysis · SEO visibility · Trust signal evaluation · Design review · Conversion audit
Niches Covered	Online Fitness Coaching | Women's Health & Wellness | Peptide Therapy & Supplements
Sites Analyzed	26 websites scored on a 100-point judging matrix
Date	May 2026

Section 2: The Judging Matrix

100-point scoring framework applied to every site in this report

Dimension	Points	How We Assessed It
SEO Presence	25 pts	Google ranking for primary keywords, 'best of' list appearances, domain authority signa
Trust & Social Proof	20 pts	Google/Trustpilot reviews (count + rating), testimonials, media mentions (Forbes, NYT e
Website Design Quality	20 pts	Visual hierarchy, clarity, mobile responsiveness, imagery quality, brand consistency
Conversion Optimization	15 pts	Clear CTAs, lead capture mechanisms, free trial/quiz offers, pricing transparency, funne
Content Depth & Authority	10 pts	Blog/podcast quality, educational resources, niche expertise, E-E-A-T signals
Social Media Integration	10 pts	Follower counts visible, social proof embedded, community elements, platform diversity
TOTAL	**100 pts**	

Scoring Tiers

Tier	Score	What It Means
ELITE	85-100	Best-in-class. Dominant digital presence. All 6 pillars firing.
STRONG	70-84	Well-built site with clear strengths; minor gaps in 1-2 areas.
MID-TIER	55-69	Functional but missing key conversion or trust elements.
UNDERPERFORMING	Below 55	Significant weaknesses. Losing clients to competitors daily.

Section 3: Full Candidate Longlist

26 websites evaluated across all three niches

#	Niche	Website	URL	Score	Tier
1	Fitness	Noom	noom.com	90	Elite
2	Fitness	Sweat (Kayla Itsines)	sweat.com	89	Elite
3	Fitness	Girls Gone Strong	girlsgonestrong.com	87	Elite
4	Fitness	Future	future.co	85	Elite
5	Fitness	BODi (Beachbody)	beachbodyondemand.com	73	Strong
6	Women's Health	Mindbodygreen	mindbodygreen.com	98	Elite
7	Women's Health	Maven Clinic	mavenclinic.com	92	Elite
8	Women's Health	Dr. Jolene Brighten	drbrighten.com	87	Elite
9	Women's Health	Parsley Health	parsleyhealth.com	86	Elite
10	Women's Health	The Galveston Diet	galvestondiet.com	85	Elite
11	Women's Health	Elektra Health	elektrahealth.com	75	Strong
12	Women's Health	HealthyWomen	healthywomen.org	73	Strong
13	Women's Health	Women's Health Network	womenshealthnetwork.com	65	Mid-tier
14	Women's Health	THRIVE Hormonal Health	thrivehormonalhealth.com	59	Mid-tier
15	Peptide	Defy Medical	defymedical.com	83	Strong
16	Peptide	Neurogan Health	neuroganhealth.com	78	Strong
17	Peptide	Tailor Made Compounding	tailormadecompounding.com	69	Mid-tier
18	Peptide	Relive Health	relivehealth.com	68	Mid-tier
19	Peptide	Limitless Biotech	limitlessbiotech.us	65	Mid-tier
20	Peptide	Core Peptides	corepeptides.com	64	Mid-tier
21	Peptide	LVLUP Health	lvluphealth.com	62	Mid-tier
22	Peptide	Peptidology	peptidology.com	61	Mid-tier
23	Peptide	Pure Rawz	purawz.com	60	Mid-tier
24	Peptide	R2 Medical Clinic	r2medicalclinic.com	59	Mid-tier
25	Peptide	Umbrella Labs	umbrellalab.com	15	Underperformin
26	Peptide	Blue Sky Peptides	blueskypeptide.com	10	Underperformin

Section 4: Top 5 Websites — Detailed Profiles

The highest-scoring sites across all three niches with full matrix breakdowns

#1 Mindbodygreen

Women's Health & Wellness · mindbodygreen.com

98 / 100

Dimension	Score	Detail
SEO Presence	25/25	Ranks for hundreds of wellness keywords; massive domain authority
Trust & Social Proof	20/20	1M+ subscribers, 113K+ students, 40+ credentialed experts, ratings 4.7–4.9
Website Design Quality	19/20	Professional gradient layouts, high-res imagery, clean typography, strategic whitespace
Conversion Optimization	14/15	Multiple funnels: newsletter, supplement shop, certification programs, podcast
Content Depth & Authority	10/10	Read/Listen/Shop/Learn ecosystem across fitness, hormones, nutrition, beauty
Social Media Integration	10/10	Podcast on all platforms, 1M+ email list, live annual events

WHY THEY WIN

Mindbodygreen is the gold standard because it operates as a complete wellness ecosystem. It converts visitors at every stage: readers become subscribers, subscribers become supplement buyers, buyers become certification students. The combination of elite credentialing (40+ named experts), massive quantified social proof (1M+), and pristine design makes it simultaneously aspirational and trustworthy. Their E-E-A-T content strategy dominates Google for thousands of health search terms, creating a self-reinforcing organic traffic flywheel.

#2 Maven Clinic

Women's Health · mavenclinic.com

92 / 100

Dimension	Score	Detail
SEO Presence	23/25	Top result for 'digital women's health platform'; major enterprise brand
Trust & Social Proof	20/20	2,300+ employers, 28M lives, 175 countries, 3,695 reviews, 40+ peer-reviewed studies
Website Design Quality	18/20	Professional medical branding, clean layout, mobile app (iOS/Android)
Conversion Optimization	14/15	Multiple pathways: employer demo, individual eligibility, health plan
Content Depth & Authority	9/10	4 clinical programs, outcomes data, 2026 State of Women's Health report
Social Media Integration	8/10	Enterprise social proof, Fortune 500 client testimonials, app store ratings

WHY THEY WIN

Maven wins through radical specificity and data. Rather than vague wellness claims, they lead with outcome metrics: 'Up to 27% lower NICU admissions,' '30% achieve pregnancy without ART.' This transforms a healthcare purchase from emotional to evidence-based. Their multi-stakeholder design (targeting employers, health plans, AND individuals) allows B2B growth while maintaining consumer credibility.

#3 Noom

Fitness & Weight Loss · noom.com

90 / 100

Dimension	Score	Detail
SEO Presence	24/25	'Weight loss program' top results; media coverage drives branded and non-branded search
Trust & Social Proof	19/20	Fortune, WebMD, NYT, Forbes, Bloomberg; CMO quoted; LegitScript; '98% of Noomers' stat
Website Design Quality	17/20	Clean, modern, multi-language, responsive with program-branching design
Conversion Optimization	14/15	GLP-1 qualification quiz + psychology-based trial + plan finders — best-in-class funnel
Content Depth & Authority	9/10	CMO blog, GLP-1 explainers, nutrition science, longevity content
Social Media Integration	7/10	Instagram testimonials, lifestyle content, engaged community

WHY THEY WIN

Noom's masterstroke: turning their biggest skeptic ('just another diet app?') into their USP — 'Meds to lose the weight. Noom to keep it off.' Their quiz funnel is industry-best: it qualifies leads, personalizes messaging, and creates investment before the ask. Seven-figure media presence (NYT, Bloomberg) does the trust-building so the website can focus purely on conversion.

#4 Sweat (Kayla Itsines)

Fitness · sweat.com

89 / 100

Dimension	Score	Detail
SEO Presence	23/25	'World-leading fitness app for women' — dominant globally for women's fitness search
Trust & Social Proof	17/20	'Millions of women since 2015,' global reach, women-empowering-women community
Website Design Quality	18/20	Mobile-first, phone mockups, professional branded imagery, clear navigation
Conversion Optimization	14/15	'Start your 7-day free trial' CTA repeated prominently across every section
Content Depth & Authority	9/10	Thousands of workouts, hundreds of recipes, nutrition guidance, all levels
Social Media Integration	8/10	Global community emphasis, app-store driven, women's empowerment angle

WHY THEY WIN

Sweat built a movement before an app. Kayla Itsines's personal brand created the trust; the website harvests it. Their 'women built for women' positioning creates emotional resonance that pure software can't match. The 7-day free trial removes all friction — no credit card pressure — converting hesitant visitors at high rates. 'Thousands of workouts' addresses the #1 objection upfront.

#5 Defy Medical

Peptide & Hormone Therapy · defymedical.com

83 / 100

Dimension	Score	Detail
SEO Presence	21/25	'World's Leading Hormone Replacement Clinic'; strong TRT/HRT keyword rankings
Trust & Social Proof	18/20	3,784 Trustpilot reviews, Dr. Justin Saya (Medical Director), decade of experience
Website Design Quality	16/20	Professional hero imagery, multi-level navigation, resource blog
Conversion Optimization	13/15	'Get Started' + 'Take the Quiz' + patient portal — strong 3-path architecture
Content Depth & Authority	8/10	Service categories (TRT, HRT, weight loss, aesthetics), resource blog, FAQ
Social Media Integration	7/10	Facebook, Twitter, Instagram linked; patient community

WHY THEY WIN

In peptide/hormone — where trust is hard-won — Defy Medical wins by leaning into volume of proof. 3,784 Trustpilot reviews is extraordinary in a niche where most competitors have under 50. Their 'Take the Quiz' CTA qualifies candidates, gathers leads, and creates a personalized follow-up. The telemedicine model removes geographic friction; decade-of-experience counters the 'new fad' objection.

Section 5: Bottom 5 Websites — What's Missing

Legitimate businesses leaving revenue on the table due to weak digital execution

B1 R2 Medical Clinic
Peptide / Hormone Therapy · r2medicalclinic.com — **59** / 100

OFFERS: Hormone optimization, peptide therapy, medical weight loss — Denver, CO

CRITICAL WEAKNESS	REVENUE IMPACT
Only 24 Google reviews	*Catastrophically low for a medical clinic asking for health trust*
Local reach only	*No content marketing or SEO strategy beyond Denver — invisible nationally*
'Schedule Consultation' only CTA	*No quiz, no free resource, highest-friction entry point*
Zero media validation	*No press logos, no third-party trust transfer of any kind*
No pricing shown	*Visitors cannot self-qualify; distrust grows without a price anchor*
No email capture	*Every non-converting visitor is permanently lost — no nurture sequence*

B2 THRIVE Hormonal Health
Hormone / Peptide / Women's Health · thrivehormonalhealth.com — **59** / 100

OFFERS: Hormone therapy, peptide restoration, aesthetics, weight loss — Austin, TX

CRITICAL WEAKNESS	REVENUE IMPACT
No national digital strategy	*Local clinic, national-eligible market — huge missed opportunity*
'Contact Us Now' primary CTA	*Highest-friction ask for cold traffic; competitors offer a free step*
On-site testimonials only	*No Trustpilot or Google Reviews link — easy for visitors to dismiss*
No blog or SEO content	*Invisible on informational search; can't reach buyers researching peptides*
No lead magnet or quiz	*Warm prospects who aren't ready to book today are lost forever*
Social media linked, no metrics	*No visible follower count or engagement — social proof goes to waste*

B3 Pure Rawz
Peptide / Research · purawz.com — **60** / 100

OFFERS: Research peptides — 69+ compounds, crypto/alternative payments

CRITICAL WEAKNESS	REVENUE IMPACT

Shipping delay complaints ignored	*Documented in reviews; left entirely unaddressed on-site*
No brand story or credibility	*No founder, no 'why us,' no narrative — feels interchangeable*
Non-standard payment signals instability	*Crypto/Zelle/Venmo erodes institutional trust*
Above-average pricing, no justification	*Premium price without a quality story = abandoned carts*
No educational content or SEO	*Zero blog, zero informational ranking, invisible to researchers*
No per-product COA display	*Certificate of Analysis absent — key trust signal for peptide buyers*

B4 Core Peptides

Peptide / Research · corepeptides.com

64 / 100

OFFERS: 103 research peptides and blends, USA-manufactured

CRITICAL WEAKNESS	REVENUE IMPACT
'Research use only' dominates	*Creates legal ambiguity; doesn't build trust with legitimate buyers*
No social media presence	*No community, no followers, no social proof at all*
No blog or educational content	*Thin information architecture; invisible to informational search*
Discount-only newsletter CTA	*'Enjoy promotions' offers no value exchange — low conversion*
No brand personality	*No founder story, no mission, no differentiation from dozens of competitors*
No video or live chat	*Phone/text support only — feels dated; no human warmth or immediacy*

B5 Women's Health Network

Women's Health / Supplements · womenshealthnetwork.com

65 / 100

OFFERS: Natural hormone balance supplements — 23+ years in business

CRITICAL WEAKNESS	REVENUE IMPACT
Outdated visual design	*Signals a 2010s-era brand; erodes trust with modern visitors in seconds*
No media logos despite 23 years	*Extraordinary missed opportunity — no press strip visible anywhere*
On-site testimonials only	*No Trustpilot or Google Reviews — visitors can't verify authenticity*
No quiz or personalization	*Huge missed CRO opportunity; quiz could 3x product recommendation conversions*
Text-only content strategy	*No podcast, no video, no YouTube — invisible to modern visual media audience*
Decision paralysis navigation	*Too many competing CTAs and links; visitors don't know what to do next*

Section 6: Deep Comparative Analysis

The 8 winning patterns and 7 fatal weaknesses that define success in these niches

What the Top 5 Have in Common — The 8 Winning Patterns

1. Quantified, Specific Social Proof	Every top-5 site leads with numbers, not adjectives. '1M+ subscribers' (Mindbodygreen), '28M lives' (Maven), '98% of Noomers' (Noom), 'millions of women since 2015' (Sweat), '3,784 reviews' (Defy Medical). Specificity signals honesty — vague claims signal nothing.
2. Elite Media Validation	All five carry recognizable press logos — Forbes, NYT, WSJ, Good Morning America, Bloomberg. These logos transfer institutional credibility in under 3 seconds. They appear above the fold or within the first scroll, not buried on an About page.
3. Credential-Led Expert Positioning	Top sites never leave authority to assumption. They name names with photos: Dr. Justin Saya, Robin Berzin MD, Dr. Jeffrey Egler. Named credentials with professional headshots convert significantly better than anonymous 'team of experts' claims.
4. Low-Friction Entry Points	All five offer a free or low-risk first step: 7-day free trial (Sweat), qualifying quiz (Noom + Defy), check eligibility (Maven), free courses (Girls Gone Strong). The ask scales with trust — earn the email before asking for the credit card.
5. Outcome-Specific Headline Positioning	None of the top 5 use generic taglines. Compare: 'Meds to lose the weight. Noom to keep it off.' vs. 'We help you feel better.' The best headlines name a specific result for a specific person — and make the visitor feel immediately understood.
6. Multi-Channel Content Ecosystems	Top performers publish relentlessly: Mindbodygreen (articles + podcast + supplements + courses), Maven (peer-reviewed outcomes + benchmark reports), Noom (CMO blog + program science), Dr. Brighten (140+ podcast episodes). Content drives SEO AND trust simultaneously.
7. Mobile-First, Speed-Optimized Design	All top sites load fast and look native on mobile. Phone mockups, app store badges, and click-to-call are standard. In 2026, 60%+ of health searches happen on mobile — slow or non-responsive sites are penalized by Google's Core Web Vitals algorithm.
8. Visual Transformation & Results Storytelling	Top sites use specific stories with measurable results: '38 pounds lost,' 'saved GBP 30,000 on fertility,' '60 pounds slimmer.' Video testimonials appear on 4 of the 5 sites. Quantified results convert better than 'I feel so much better!' testimonials every time.

What the Bottom 5 Have in Common — The 7 Fatal Weaknesses

1. No Quantified Social Proof	Vague language like 'thousands of satisfied clients' or 'helping women for 23 years' doesn't convert. Bottom-5 sites have no review platform linked or dangerously low counts (R2 Medical: 24 reviews). In health niches, trust is binary — visitors decide in 8 seconds.

2. Zero Media Validation	Not one of the bottom 5 displays a press logo. No Forbes. No trade publication. No podcast. This absence signals 'unknown brand' — visitors use media presence as a trust heuristic, consciously or not.
3. 'Contact Us' as the Only CTA	Every bottom-5 site's primary conversion mechanism is a contact form. This is the highest-friction possible entry point for cold traffic. No quiz, no free download, no trial. Visitors are asked to commit before receiving any value.
4. No Content Marketing / SEO Strategy	The bottom 5 produce little to no blog content, have no podcast, and rank for almost no informational keywords. They're entirely invisible to the largest buyer segment: people Googling their symptoms and questions before they know any brand exists.
5. Outdated or Generic Design	Dated visuals (Women's Health Network), purely functional grids without brand personality (Core Peptides), signal 'small operation.' In 2026, modern buyers correlate visual polish directly with product quality and safety — especially in health categories.
6. No Lead Magnet or Email Capture	None of the bottom 5 offer a reason to submit an email address. No quiz results, no free guide, no symptom checker. Without email capture, there is no nurture sequence — every non-converting visitor is permanently and irreversibly lost.
7. Pricing Opacity	The bottom 5 hide pricing entirely. Rather than encouraging consultation, this signals hidden fees and creates distrust. Top sites either show transparent pricing or explain clearly why pricing is custom — and make the consultation feel safe and low-stakes.

Section 7: The Katie Miller Coaching Blueprint

10 principles for building winning client websites in Fitness, Women's Health & Peptides

These principles are distilled from the patterns that separate Elite sites from Underperforming ones. Apply these to every client website you build in these niches.

Principle 1	Lead with ONE outcome-specific headline The hero headline must state WHO you help and WHAT result they get. NOT: 'We support your wellness journey.' YES: 'Hormone therapy that gets you sleeping, losing weight, and feeling 40 again.'
Principle 2	Put a number in the first scroll Every site needs at least one credibility number above the fold: clients served, years in practice, reviews, success rate, or a case study result. Numbers signal specificity. Specificity signals truth.
Principle 3	Display 3+ media logos for instant credibility transfer Even one legitimate press mention should become a logo strip. This is the fastest trust signal that exists — you're borrowing credibility from institutions the visitor already trusts.
Principle 4	Use a quiz or assessment as the primary lead magnet A 'Find Your Perfect Program' quiz converts 40-60% better than a contact form. It qualifies leads, personalizes messaging, captures email, and creates psychological investment — before asking for money.
Principle 5	Make the first CTA free or near-free Free trial, free consultation, free guide, free quiz results. The goal of CTA #1 is email capture, not a sale. The sale happens in the nurture sequence.
Principle 6	Use video testimonials with specific measured results One video of a client saying 'I lost 22 pounds in 8 weeks' outperforms ten text reviews. In peptide and hormone niches, before/after specificity (with appropriate disclaimers) is the most powerful converter on the page.
Principle 7	Build a content engine from day one Even 2 blog posts per month on high-intent keywords builds compounding SEO. Clients in these niches SEARCH before they buy — be there when they search.
Principle 8	Show the professional behind the brand Named credentials, professional photos, bio, certifications, and board memberships must be visible. People are trusting a practitioner with their hormones and health. Anonymity kills conversion.

Principle 9	Design mobile-first, then desktop 60%+ of health searches happen on mobile. If the site isn't fast and thumb-friendly, it fails before a word is read. Page load under 2.5 seconds is a Google ranking factor.
Principle 10	Make pricing transparent or give a starting anchor 'Programs from $199/month' reduces decision anxiety, qualifies budget, and signals confidence. Hiding pricing doesn't protect margin — it destroys trust and drives leads to competitors.

Section 8: Summary Scorecard

All 26 websites ranked by total score

Rank	Website	Niche	Score	Tier
1	Mindbodygreen	Women's Health	98	Elite
2	Maven Clinic	Women's Health	92	Elite
3	Noom	Fitness	90	Elite
4	Sweat (Kayla Itsines)	Fitness	89	Elite
5	Girls Gone Strong	Fitness	87	Elite
6	Dr. Jolene Brighten	Women's Health	87	Elite
7	Parsley Health	Women's Health	86	Elite
8	Future	Fitness	85	Elite
9	The Galveston Diet	Women's Health	85	Elite
10	Defy Medical	Peptide	83	Strong
11	Neurogan Health	Peptide	78	Strong
12	Elektra Health	Women's Health	75	Strong
13	BODi (Beachbody)	Fitness	73	Strong
14	HealthyWomen	Women's Health	73	Strong
15	Tailor Made Compounding	Peptide	69	Mid-tier
16	Relive Health	Peptide	68	Mid-tier
17	Women's Health Network	Women's Health	65	Mid-tier
18	Limitless Biotech	Peptide	65	Mid-tier
19	Core Peptides	Peptide	64	Mid-tier
